New LED technology enables us to set the light colour temperature to a preferred colour

Ledlam® offers 3 different colour temperatures

Warm white
A yellowish white colour,
similar to the original incandescent or halogen bulbs.
These are recommended where you want to have a
relaxed atmosphere like living rooms, bedrooms etc.

Day white
Similar to a natural outdoor sunny daylight colour,
suitable for landing areas, bathrooms, kitchens, corridors, etc.

Cool white
A pure white colour,
suitable for working environments and
other more contemporary areas.

Warm White
2800K-3400K

Day White
4000K-4500K

Cool White
6000K-6500K
